After 18 years exertions, commencing in a small way, the opplarity of my articles has extended to all parts of the Cutted States, and widely throughout Fereign countries -- and this in the face of much opposition. Every means has been sorted to by unprincipled dealers since their merit and succost have been know-such as advertising larger bottles at less price, censuring all other preparations, and even copying my advertisements-but I am happy to state that out of the many who have reserted to this, none have been successful. MY OBJECT

in this notice is to make facts known to the publics and respectable dealers, believing, after so many years' exertions, that the Druggists will discountenance such proceedings, and that the reputation of my articles may not be damaged by the esc of inferior or spurious ones. Knowing that many may read this acticle who are unacquain

When on a visit to the city of New York a few days ago, I was induced to call on my old friend and townsman Mr. T. T. Helmbold, Druggist, 59 Broadway, N. Y. His Store is a Model—a perfect Gen—the handsoment of any kind we have ever had the pleasure of viewing, and so extensive, being 34 feet front, five stories in height, and over 200 feet deep. It indeed affords us much pleasure to know that he has been so successful, and it is ample evidence of the merits of his articles—as in our whole business experience we have not known of the success of any article without Merit—advertising mereby bringing the name before the people." ty bringing the name before the people."

The writer reluctantly inserts the above, and would not do so were he not a stranger to many; and concludes by stating the names of his articles, and the diseases for which they have been used by many thousands with complete success.

THE UNION APPLE PARER. ENTIRELY NEW. THE UNION APPLE PARING MA-CHINE is so constructed that the Knife pares going both ways, commencing at each end of the several apples alternately, thus avoiding a waste of time in turning back without paring, and also overcoming the objections to the "snap machines."

It contains a less number of parts than any other machine The gears are all connected directly with each other, there-by dispensing with the arbor or rod to connect them, and which has always been liable to work loose and turn around without moving the parts.

It is about the usual weight of others but more compact, thus being stronger and requiring a smaller box and thereby saving freight.
IT IS VERY THOROUGH IN ITS CONSTRUCTION, and s not liable to get out of order by constant or hard using. Only four turns of the crank is required to pare each apple. It has a straight knife, consequently leaves the apple smooth and handsome.

It will pare a large or small apple equally as well.

Great pains have been taken to perfect this machine in all its parts, and it is WARRANTED ENTIRELY SATISFACTORY.
